A study by Dr. Paul Hanel and colleagues concluded that people are more likely to behave politely when listening to ideas they disagree with if they think about values before they engage in a discussion. Study participants were assigned to one of two groups. The experimental group spent a few minutes writing about one of their personal values before they had a group discussion on a controversial topic. And the control group spent a few minutes writing about a drink (tea, milk, etc.) before their group discussion on that topic. Hanel and colleagues found that the experimental group’s discussion was more civil than the control group’s discussion was.

Which choice best describes the main purpose of the text?

- A. To describe a widely held belief and how a study’s results support that belief
- B. To argue that researchers were surprised by the results of a certain study
- C. To suggest ways to improve a certain study’s experimental design
- D. To explain a study’s conclusion and how a research team arrived at that conclusion

Text 1

Mycoprotein is a fungal biomass that can be eaten as an alternative to meat. Studies of the environmental impact of its manufacture generally agree it is lower than that of beef and closer to that of chicken or pork. But the expense of producing mycoprotein restricts its availability to a few countries with postindustrial economies. Knowing that cost reductions would expand access to mycoprotein, biochemists are exploring solutions, such as a cheaper substrate to feed the mycoprotein as it grows.

Text 2

Cattle farming is a principal cause of global deforestation, and a study by Florian Humpenöder and his colleagues found that replacing 20% of beef consumption worldwide with consumption of mycoprotein would cut deforestation by half if accomplished over the next thirty years. However, this would likely involve only a small change in agricultural water consumption, since water once dedicated to raising cattle would be diverted to raising crops instead.

Based on the texts, how would the author of Text 1 most likely respond to the study findings mentioned in Text 2?

- By emphasizing that since agricultural water consumption would remain static in the event of replacing beef consumption with mycoprotein consumption, an effort must be made to substitute mycoprotein for chicken and pork in diets as well
- By asserting that the development of a more inexpensive substrate for mycoprotein production would contribute to the goal of decreasing worldwide deforestation over time
- By noting that most people would be more likely to use mycoprotein as a substitute for chicken or pork in their diets than as a substitute for beef
- By pointing out that some countries are responsible for greater deforestation than others and thus, to have any significant effect on the environment, will have to replace more than 20% of their beef consumption with mycoprotein

PSAT2 RW 1.10

Microplastics are tiny pieces of plastic waste. Areas of the ocean with higher concentrations of microplastic particles also have smaller and fewer waves. A study by Yukun Sun and colleagues found that the concentration of microplastic particles cannot be the only reason for this reduced wave activity because the concentration of particles that would have the observed effect is much higher than that found in these areas of the ocean. However, they found that surfactants, chemicals often used to manufacture plastics, are released into the water from microplastics and have a much stronger wave-reducing effect.

According to the text, what did Sun and colleagues discover about surfactants?

- A. They have a much stronger effect on wave activity than microplastics alone do.
- B. They are mainly composed of water.
- C. They are helpful for removing microplastics from the ocean.
- D. They can be used to contain microplastics within certain areas of the ocean.

Jia Hu and colleagues hypothesized that workplace leaders who reflect on lessons learned from past mistakes are likely to exhibit more humility than leaders who don't engage in such reflection. To test this, the team placed 301 managers in one of three groups. Participants in two experimental groups were asked to reflect on a mistake, one group focusing on a mistake that resulted in learning and the other group focusing on a mistake that didn't result in learning. Participants in a control group were asked to reflect on their daily routine. All the participants then described how they would respond to a workplace scenario. After evaluating the responses for evidence of humility, the researchers concluded that their hypothesis was correct.

Which choice best describes data in the graph that support the researchers' conclusion?

- A. None of the three groups' average humility scores exceeded 3.5.
- B. The managers in the control group exhibited only slightly less humility on average than the managers in the two experimental groups did.
- C. The managers who reflected on a past mistake that resulted in learning exhibited more humility on average than the managers in the other two groups did.
- D. All three groups exhibited less humility on average than the researchers expected.

In the 1960s, Chavela Vargas became an unlikely star in ranchera, a style of traditional Mexican music. Most ranchera singers had clear, polished voices and performed with a full band. But Vargas accompanied her raspy voice with just her guitar. Dressed in men’s trousers and a poncho, she would perform classic songs that had been written from a male point of view and were usually sung by men. She also altered those songs by performing them much more slowly than other ranchera singers did. The slower tempo allowed her to express the emotional quality of the lyrics more fully.

According to the text, what is one way that Vargas differed from other ranchera singers?

- A. She possessed a voice that was clear and polished.
- B. She avoided singing songs written from a male point of view.
- C. She disliked performing classic songs.
- D. She altered classic songs by slowing them down.

Happy House is a 1920 novel by Jane Abbott. The narrator presents a young woman as being unimpressed with the house she is visiting: _____

Which quotation from *Happy House* most effectively illustrates the claim?

- A. “Her first feeling was of disappointment; in the square lines of the house there was little claim to beauty.”
- B. “Someone had opened one of the blinds so here there was more light.”
- “The door, built squarely in the middle of the house, opened almost directly upon a stone-flagged path that led in a
- C. straight line to the road.”
- D. “She tip-toed through the hall and opened the door on the right.”

Average Prices Received by US Growers for Citrus Fruits, 2020–2021 (dollars per box)

Fruit	June 2020	June 2021	July 2020	July 2021
Grapefruits	\$13.80	\$23.72	\$16.13	\$22.98
Oranges	\$16.15	\$11.09	\$15.53	\$13.79
Lemons	\$19.50	\$28.94	\$21.01	\$31.78

An employee of a citrus grower in the United States is analyzing the prices of several varieties of fruit over the course of a growing season. The employee wishes to know how much a grower could have expected to receive on average for a box of lemons in July 2021. Consulting the table, the employee finds that this amount is _____

Which choice most effectively uses data from the table to complete the statement?

- A. \$31.78.
- B. \$23.72.
- C. \$22.98.
- D. \$28.94.

Ochre sea stars live in tidal pools along the shoreline of the Pacific Ocean. At night, they move to higher shore levels in search of prey. But scientists Corey Garza and Carlos Robles noticed that ochre sea stars stayed at lower levels at night after heavy rains. Garza and Robles hypothesized that a layer of fresh water formed by rainfall was a barrier to the sea stars. To test their hypothesis, the scientists did an experiment. They placed some sea stars in a climbable tank of seawater and other sea stars in a similar tank of seawater with a layer of fresh water on top. Then, the scientists watched the sea stars’ behavior at night.

Which finding from the experiment, if true, would most directly support Garza and Robles’s hypothesis?

- None of the sea stars climbed to the tops of the tanks, but sea stars in the tank with only seawater moved around the

A. bottom of the tank more than sea stars in the other tank did.
- Sea stars in the tank with only seawater climbed to the top of the tank, but sea stars in the other tank stopped climbing

B. just below the layer of fresh water.
- Both groups of sea stars climbed to the tops of the tanks, but sea stars in the tank with only seawater climbed more

C. slowly than sea stars in the other tank did.
- Sea stars in the tank with only seawater mostly stayed near the bottom of the tank, but sea stars in the other tank

D. climbed into the layer of fresh water.

A main goal of the Association for the Advancement of Creative Musicians (AACM), an arts organization founded in 1965, is to advance new works by Black musicians. The AACM achieves this goal in part by focusing on young artists. By having established musicians and composers serve as mentors, the AACM gives young artists the benefits of expert technical training and creative guidance. Numerous organizations offer similar kinds of support to new generations of painters, writers, and other artists, suggesting that _____

Which choice most logically completes the text?

- A. artists of all ages benefit more from technical training than from creative guidance.
- B. many arts organizations recognize the importance of providing opportunities for young artists to learn from experienced mentors.
- C. most established artists could become even better artists by serving as mentors.
- D. finding a mentor is more important for musicians than it is for painters, writers, and other types of artists.

Silicon-based photovoltaic cells account for 95% of the cells used in solar panels worldwide despite converting an average of only 18–22% of the sunlight that reaches them. In a study addressing this relative inefficiency, a team led by Laura Miranda-Pérez demonstrated that the addition of a thin layer of the mineral perovskite—which captures the blue range of light in the solar spectrum, whereas silicon captures the red range—allows the cells to convert 29.5% or more of the Sun’s energy into usable electricity. Cells made with only perovskite, however, are no more efficient than silicon-based ones. It’s reasonable to conclude, then, that _____

Which choice most logically completes the text?

- photovoltaic cells with both silicon and perovskite are more efficient because they make use of more of the solar
- A. spectrum.
 - B. photovoltaic cells with only perovskite and no silicon would likely convert more than 29.5% of the Sun’s energy.
 - C. solar power will remain elusive until photovoltaic cells are replaced with a more practical technology.
 - D. researchers need to evaluate whether other minerals like perovskite are as effective as perovskite seems to be.

While researching a topic, a student has taken the following notes:

Here I Have Returned is a sculpture by Egyptian American artist Sherin Guirguis. It is a large, curved strip of wood inspired by the shape of a sistrum. A sistrum is a curved musical instrument played by ancient Egyptian priestesses in ceremonies. Guirguis says that the sculpture symbolizes “women who have lifted and supported Egyptian society and culture.” Overall, Guirguis wants her works to “engage audiences in a dialogue about power, agency, and social transformation.”

The student wants to use a quotation from Guirguis to explain what the sculpture represents. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- Guirguis, whose works include a sculpture that is a large, curved strip of wood, has explained that she wants her work to
- A. create a dialogue with audiences.
- Inspired by the sistrum played by Egyptian priestesses, *Here I Have Returned* symbolizes “women who have lifted and
- B. supported Egyptian society and culture,” according to Guirguis.
- According to Guirguis, the curved strip of wood used in *Here I Have Returned* was inspired by the sistrum, a musical
- C. instrument played by ancient Egyptian priestesses in ceremonies.
- Guirguis, the sculptor of *Here I Have Returned*, wants her works to “engage audiences in a dialogue about power, agency,

While researching a topic, a student has taken the following notes:

- A small number of US Navy sailors of Filipino descent served during the US Civil War (1861–1865).
- Stephen Amos was born in the Philippines around 1830. He enlisted in the US Navy in November 1863.
- Raphael Ignases was born in the Philippines around 1834. He enlisted in the US Navy in July 1861.

The student wants to emphasize the historical significance of Stephen Amos’s enlistment date. Which choice most effectively uses relevant information from the notes to accomplish this goal?

Both Stephen Amos and Raphael Ignases were US Navy sailors of Filipino descent, but Amos enlisted in the Navy in 1863, two years later than Ignases.

Stephen Amos was a US Navy sailor of Filipino descent, along with Raphael Ignases, who was born in the Philippines around 1834.

Stephen Amos enlisted in the US Navy in 1863, making him one of the few sailors of Filipino descent to serve in the US Civil War (1861–1865).

When Stephen Amos enlisted in the US Navy in November 1863, he joined sailors such as Raphael Ignases, who had been born in the Philippines around 1834.

The following text is from the 1895 poem “Marshlands” by Emily Pauline Johnson, a Kanienkahagen (Mohawk) writer also known as Tekahionwake.

Among the wild rice in the still lagoon, In monotone the lizard shrills his tune.
The wild goose, homing, seeks a sheltering, Where rushes grow, and oozing lichens cling.
Late cranes with heavy wing, and lazy flight, Sail up the silence with the nearing night.
And like a spirit, swathed in some soft veil, Steals twilight and its shadows o’er the swale.
Hushed lie the sedges, and the vapours creep, Thick, grey and humid, while the marshes sleep.

- Which choice best describes the overall structure of the text?
- A. It names animal species found in a place, then names plant species there.
 - B. It sketches a setting by presenting a series of images of nature.
 - C. It makes an extended comparison of nature to human emotions.
 - D. It identifies a location, then refers to a person living there.

PSAT2 RW 3.8

In her 1998 book *Blues Legacies and Black Feminism*, Angela Y. Davis bases her analysis in part on recordings of songs sung in the 1920s by Gertrude “Ma” Rainey and Bessie Smith. Davis focuses on how Rainey and Smith improvised the lyrics—replacing the original lines with mischievous jokes and wordplay. Davis’s work was particularly labor intensive because in order to transcribe, or write down, the lyrics as Rainey and Smith sang them, Davis had to listen repeatedly to the vinyl recordings, which weren’t very clear.

What does the text most strongly suggest about the songs sung by Rainey and Smith?

- A. The songs have grown in popularity since Rainey and Smith first sang them.
- B. There were more recordings made of Rainey’s songs than there were of Smith’s.
- C. There were few, if any, reliable transcriptions of Smith’s and Rainey’s improvised lyrics when Davis began her research.
- D. According to Davis, the songs sung by Rainey were more musically innovative than those sung by Smith typically were.

PSAT2 RW 3.9

The following text is from Milan Kundera’s 1984 novel *The Unbearable Lightness of Being* (translated by Michael Henry Heim in 1984). Karenin is a dog that belongs to Tomas and Tereza.

Karenin was not overjoyed by the move to Switzerland [from Prague]. Karenin hated change. Dog time cannot be plotted along a straight line; it does not move on and on, from one thing to the next. It moves in a circle like the hands of a clock, which—they, too, unwilling to dash madly ahead—turn round and round the face, day in and day out following the same path. In Prague, when Tomas and Tereza bought a new chair or moved a flower pot, Karenin would look on in displeasure. It disturbed his sense of time. It was as though they were trying to dupe the hands of the clock by changing the numbers on its face.

©1984 by Milan Kundera. Translation ©1984 by Harper & Row, Publishers, Inc.

Which choice best states the main idea of the text?

- As a dog, Karenin possesses a sense of time that involves a strong preference for predictability and an aversion to disruption.
- After he’s moved to a new home, Karenin’s negative response to changes has become more pronounced.
- Similar to Tomas and Tereza, Karenin comprehends time as circular rather than as a straightforward progression.

As is the case for other dogs, Karenin’s sense of time seems to accelerate depending on the objects and places that surround him.

Gorgets, or necklaces with large pendants, have been part of the ceremonial attire of tribes from the US Southeast for centuries. One of the oldest examples, the Fairfield Gorget, was found in Fairfield, Missouri, in 1958. Its overall design resembles that of other art from the region during the Mississippian period (900–1600 CE). Yet the image on the gorget is of a jaguar—a species whose range doesn’t extend to Missouri. Jaguar images are common in ancient Mexican art, and Mexico lies squarely in the species’ range. Therefore, some scholars argue that long-distance trade in Mexican art objects brought the imagery to Missouri, where a local artist could have adopted it and incorporated it into the Fairfield Gorget.

Which finding, if true, would most strongly support the underlined explanation?

- The Fairfield Gorget is dated not to the Mississippian period but instead to the earlier Woodland period, which ended around 900 CE.
- The range of the jaguar is shown to have expanded dramatically after the Mississippian period came to a close around 1600 CE.
- An ancient Mexican art object is found at a site that dates to the Mississippian period and is close to where the Fairfield Gorget was found.
- Certain works by present-day artists from Southeastern tribes reflect outside cultural influences, including contemporary Mexican art.

Participative pricing, in which purchasers choose the prices they pay for products, can enable sellers to capitalize on the heterogeneous values consumers assign to the same goods and services, but doing so requires careful messaging. Annie Peng Cui and Jennifer Wiggins recruited 171 participants (ages 18–60) online for an initial study and 83 students (ages 18–31) at a state university for a second study to test the effect of three different messages—“pay what you can,” “pay what you think it’s worth,” and “pay what you want”—on how much participants would pay for concert tickets. Their results illustrate both the heterogeneity of consumer valuations and how sellers can benefit by prompting consumers to consider their own valuations: _____

Which choice most effectively uses data from the graph to complete the text?

- A. the students tended to value the concert tickets more highly than did the more age-diverse group recruited online, but when considering what they could afford to pay, the students tended to choose a lower price than did the other group.
- B. in all three messaging conditions, the group of participants recruited online tended to choose lower prices than did the students, but both groups tended to choose prices closest to the actual cost of the tickets when prompted to consider the tickets’ value.
- C. the students tended to value the concert tickets more highly than did the more age-diverse group recruited online, but both groups tended to choose a higher price when considering the value of the tickets than when considering what they could afford or wanted to pay.
- D. within each group of participants, there was wide variation in the value that individuals assigned to the concert tickets, but the students tended to assign a higher value to the tickets than did the more age-diverse group recruited online.

PSAT2 RW 3.12

Initially observed in 2017, the interstellar object ‘Oumuamua is the first object of its kind to be seen in our solar system. Researchers have been puzzled because its acceleration cannot be entirely explained by the gravitational pull of nearby bodies: there must be a nongravitational influence on its velocity and trajectory. Some previously suggested explanations for this nongravitational acceleration involve mechanisms that are unlikely or unrealistic, such as geometric effects from ‘Oumuamua being potentially composed of several spatially separated bodies. Now, Jennifer Bergner and colleagues propose that the nongravitational acceleration is due to the gaseous expulsion of entrapped hydrogen from ‘Oumuamua’s water-rich icy body.

Which statement, if true, would most strongly support the claim made by Bergner and colleagues about the cause of ‘Oumuamua’s acceleration?

- Existing proposed models of outgassing from ‘Oumuamua include the direct conversion of nitrogen or carbon monoxide from a solid to a gaseous state without becoming liquid, but these models have theoretical or observational
- A. inconsistencies.
- ‘Oumuamua’s trajectory is inconsistent with a nongravitational acceleration that would be caused by the release of hydrogen gas resulting from the processing of water ice (H₂O), but the interstellar object’s observable properties can be
- B. explained if it has a significant component of molecular hydrogen ice (H₂).
- Since nongravitational accelerations of interstellar objects are several orders of magnitude weaker than gravitational accelerations, deviation from behavior that could be fully attributed to gravitational pull has been detected on a limited
- C. number of objects similar to ‘Oumuamua.
- Exposure to interstellar cosmic radiation can result in the formation of embedded pockets of hydrogen gas in water ice; moreover, when traveling through the solar system, ‘Oumuamua experienced warming sufficient to alter its icy structure
- D. and allow for outgassing.

PSAT2 RW 3.13

A main goal of the Association for the Advancement of Creative Musicians (AACM), an arts organization founded in 1965, is to advance new works by Black musicians. The AACM achieves this goal in part by focusing on young artists. By having established musicians and composers serve as mentors, the AACM gives young artists the benefits of expert technical training and creative guidance. Numerous organizations offer similar kinds of support to new generations of painters, writers, and other artists, suggesting that _____

Which choice most logically completes the text?

- A. artists of all ages benefit more from technical training than from creative guidance.
- B. many arts organizations recognize the importance of providing opportunities for young artists to learn from experienced mentors.
- C. most established artists could become even better artists by serving as mentors.
- D. finding a mentor is more important for musicians than it is for painters, writers, and other types of artists.

Tatiana R. Feuerborn and colleagues analyzed the genomes of more than a hundred domesticated dogs from sites in Siberia dating from 11,000 years ago to the present. They found that the dogs constituted a genetically isolated population of Arctic breeds until approximately 2,000 years ago, at which point there was substantial interbreeding with Near Eastern dog breeds. Furthermore, beginning around 2,000 years ago, some sites contain artifacts consistent with a Near East origin, like glass beads, but the people show no evidence of having traveled extensively outside Siberia. From this, Feuerborn and colleagues concluded that around 2,000 years ago _____

Which choice most logically completes the text?

- A. dogs and artifacts like glass beads began to be transported from the Near East to Siberia.
- B. people from Siberia began to reach the Near East, where they acquired dogs and artifacts such as glass beads.
- C. glass beads and other artifacts from the Near East began to be exchanged for dogs from Siberia.
- D. dogs from the Near East began to be exchanged for glass beads and other artifacts from Siberia.

PSAT2 RW 3.23

While researching a topic, a student has taken the following notes:

- Scientists have long sought to determine the origin of glass in Chile’s Atacama Desert.
- A 2017 study concluded that ancient grass fires had melted the area’s sandy soil into glass.
- In 2021, a different study revealed that the mineral signatures of glass samples were consistent with the mineral signatures of comet samples collected by NASA.
- That study concluded that the glass had formed as a result of a cometary explosion close to the desert’s surface.

The student wants to describe how scientific understanding about the glass’s origin has evolved. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- Scientists have long sought to determine the origin of the glass, with one study concluding that it formed when ancient
- A. grass fires melted the area’s sandy soil.
 - B. Studies in 2017 and 2021 offered different explanations for the origin of the glass.
 - C. research.
 - D. glass formed as a result of a cometary explosion close to the desert’s surface.

PSAT2 RW 3.24

While researching a topic, a student has taken the following notes:

- By interlocking their bodies, ants can form bridges to help fellow ants cross gaps.
- In 2020, Yasemin Ozkan-Aydin was inspired by ant behavior to design collaborative quadruped robots.
- Over the course of a year, she designed, built, tested, and refined her robots.
- Each robot is programmed to send a signal to another robot upon encountering a gap in a path.
- The signaled robot connects to the back of the signaler robot via magnetic sensors and pushes it across the gap.

The student wants to begin a narrative about the creation of the robots. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- When one of Yasemin Ozkan-Aydin’s robots encounters a gap in its path, it sends a signal to another robot; the signaled
- A. robot connects to the back of the signaler and pushes it across the gap.
 - B. After a year, Yasemin Ozkan-Aydin had designed, built, tested, and refined her robots.
 - C. set out to design quadruped robots capable of similarly collaborative behavior.
 - D. Ants, which have inspired the design of robots, form bridges by interlocking their bodies.

PSAT2 RW 3.25

While researching a topic, a student has taken the following notes:

- Some animals have evolved to physically resemble another animal, plant, or object. This is known as mimicry.
- Crab spiders mimic the appearance of flowers. This helps crab spiders ambush their prey.
- Katydids mimic the appearance of leaves. This helps katydids hide from their predators.

The student wants to emphasize a difference in how katydids and crab spiders use mimicry. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Katydids mimic the appearance of flowers, and crab spiders mimic that of leaves.
- B. Katydids and crab spiders are two examples of animals that use mimicry.
- C. Unlike crab spiders, which use mimicry to ambush prey, katydids use mimicry to hide from predators.
- D. Animals that use mimicry have evolved to resemble another animal, plant, or object.

PSAT2 RW 3.27

While researching a topic, a student has taken the following notes:

- A sestina is a thirty-nine-line poetic form.
- Each line of the poem ends with one of six end words, which alternate according to a set pattern.
- “Forage Sestina” is a sestina by Marilyn Hacker. Its end words are *words, structure, wire, beam, wall, and room*.
- “Towards Autumn” is a sestina by Marilyn Hacker. Its end words are *daughter, friend, bread, mother, lover, and myself*.

The student wants to use one of the poems to illustrate the sestina form. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- Hacker employs the sestina, a poetic form with thirty-nine lines and six end words, in both “Forage Sestina” and “Towards A. Autumn.”
- As a sestina, “Towards Autumn” contains thirty-nine lines and six end words—in this case, *daughter, friend, bread, mother, B. lover, and myself*—that alternate in a set pattern.
- The thirty-nine-line sestina form uses the words *daughter, friend, bread, mother, lover, and myself*, which are found in the C. poem “Forage Sestina.”
- Hacker has used the sestina form multiple times, as in “Towards Autumn,” which contains these six words: *words, D. structure, wire, beam, wall, and room*.
