The following text is adapted from Jean Webster’s 1912 novel *Daddy-Long-Legs*. The narrator is a young college student writing letters detailing her weekly experiences.

[The college is] organizing the Freshman basket-ball team and there’s just a chance that I shall make it. I’m little of course, but terribly quick and wiry and tough. While the others are hopping about in the air, I can dodge under their feet and grab the ball.

Which choice best states the main purpose of the text?

- A. To compare basketball with other sports
- B. To provide details of how to play basketball
- C. To state how players will be chosen for the basketball team
- D. To explain why the narrator thinks she might make the basketball team

SAT5 RW 1.6

Researchers have long hypothesized that woolly mammoths were hunted to extinction in North America by humans using spears with grooved tips known as Clovis points. One anthropologist set out to test this hypothesis. Using a mechanical spear-thrower, he launched spears with Clovis points into mounds of clay—substitutes for the animals’ large bodies. The projectiles generally penetrated only a few inches into the clay, an amount insufficient to have harmed most woolly mammoths. This led the anthropologist to conclude that hunters using spears with Clovis points likely weren’t the principal drivers of the extinction.

Which choice best states the main purpose of the text?

- A. To argue for the significance of new findings amid an ongoing debate among researchers
- B. To discuss the advantages and disadvantages of the method used in an experiment
- C. To summarize two competing hypotheses and a major finding associated with each one
- D. To describe an experiment whose results cast doubt on an established hypothesis

SAT5 RW 1.7

The ancient writing system used in the Maya kingdoms of southern Mexico and Central America had a symbol for the number zero. The earliest known example of the symbol dates to more than 2,000 years ago. At that time, almost none of the writing systems elsewhere in the world possessed a zero symbol. And the use of zero in Mexico and Central America may be even more ancient. Some historians suggest that Maya mathematicians inherited it from the Olmec civilization, which flourished in the region 2,400–3,600 years ago.

According to the text, what do some historians suggest about Maya civilization?

- A. Maya civilization acquired the use of zero from the Olmec civilization.
- B. Maya civilization respected its historians more than it respected its mathematicians.
- C. Maya civilization was highly secretive about its intellectual achievements.
- D. Maya civilization tried to introduce its writing system to other civilizations.

SAT5 RW 1.8

A subject of much speculation, distinctive sets of parallel ridges mark the icy crust of Europa, Jupiter’s smallest moon. Researchers now claim that the ridges’ formation mechanism mirrors that of a strikingly similar pair on Greenland’s ice sheet. There, surface water seeped through fissures in the sheet and formed a water pocket that subsequently disrupted the overlying ice, forcing fragments of it upward and outward into peaks, as the pocket froze and expanded. Although Europa lacks liquid surface water, the same process could be driven by the moon’s subsurface ocean.

Which choice best states the main idea of the text?

- Researchers think that the ridges on Europa and the ridges in Greenland may have been formed by the same process
- A. even though Europa, unlike Greenland, doesn’t have liquid water on its surface.
- The primary difference between the ridges on Europa and the ridges in Greenland is that unlike the Europa ridges, the
- B. Greenland ridges are parallel.
- The pair of ridges found on Greenland’s ice sheet appear to have formed long before the recently discovered sets of
- C. ridges on Europa formed.
- Researchers don’t understand why Europa is marked by so many sets of ridges when the moon doesn’t have any liquid
- D. water on its surface that could have collected and expanded under the icy crust.

SAT5 RW 1.9

To understand how Paleolithic artists navigated dark caves, archaeologist M^a Ángeles Medina-Alcaide and her team tested different lighting methods in a cave in Spain using replicas of artifacts found in European caves with art. They used three different Paleolithic light sources—torches, animal-fat lamps, and fireplaces—determining that each likely had a specific purpose. For instance, the team learned that the animal-fat lamps were less useful than torches while walking because the lamps didn’t illuminate the cave floor.

Which choice best states the main idea of the text?

A. Medina-Alcaide and her team’s study demonstrated that fireplaces were essential to the creators of Paleolithic cave art.

Medina-Alcaide and her team discovered that Paleolithic cave artists in Spain used animal-fat lamps more often than
B. they used torches.

Medina-Alcaide and her team were reluctant to draw many conclusions from their study because of the difficulty they had
C. replicating light sources based on known artifacts.

Medina-Alcaide and her team tested Paleolithic light sources and learned some details about how Paleolithic artists
D. traveled within dark caves.

Total Science Research Submissions
by Topic, 2016–2019

A student is researching the trends in the topics submitted to a national science fair for high school students. The graph shows the number of submissions by topic that were made each year. Based on the data in the graph, the student claims that there were more medicine and health research topics submitted in 2019 than in any other year.

Which choice most effectively uses data from the graph to support the underlined claim?

- In 2016, the number of cellular and molecular biology topic submissions was the same as the number of animal science A. topic submissions.
- In 2019, there were more physics and space science topic submissions than there were medicine and health topic B. submissions.
- C. The lowest number of animal science topic submissions in a year was approximately 95 in 2016.
- D. The highest number of medicine and health topic submissions during the period shown is approximately 285 in 2019.

“Looking Back on Girlhood” is an 1892 short story by Sarah Orne Jewett. In the story, the narrator explains that she prefers her hometown to other places she has visited: _____

Which quotation from “Looking Back on Girlhood” most effectively illustrates this claim?

A. “There is always something fresh, something to be traced or discovered, something particularly to be remembered.”

“Two large rivers join just below the village at the head of tide-water, and these, with the great inflow from the sea, make a magnificent stream, bordered by lovely green fields that slope gently to long lines of willows at the water’s edge.”

“I have had a good deal of journeying in my life, and taken great delight in it, but I have never taken greater delight than in my rides and drives and tramps and voyages within the borders of my native town.”

D. “There is never-ending pleasure in making one’s self familiar with such a region.”

External shopping cues are a type of marketing that uses obvious messaging—a display featuring a new product, for example, or a “buy one, get one free” offer—to entice consumers to make spontaneous purchases. In a study, data scientist Sam K. Hui and colleagues found that this effect can also be achieved with a less obvious cue: rearranging a store’s layout. The researchers explain that trying to find items in new locations causes shoppers to move through more of the store, exposing them to more products and increasing the likelihood that they’ll buy an item they hadn’t planned on purchasing.

Which response from a survey given to shoppers who made a purchase at a retail store best supports the researchers’ explanation?

- “I needed to buy some cleaning supplies, but they weren’t in their regular place. While I was looking for them, I saw this interesting notebook and decided to buy it, too.”

“I didn’t buy everything on my shopping list today. I couldn’t find a couple of the items in the store, even though I looked all over for them.”

“The store sent me a coupon for a new brand of soup, so I came here to find out what kinds of soup that brand offers. I decided to buy a few cans because I had the coupon.”

“This store is larger than one that’s closer to where I live, and it carries more products. I came here to buy some things that the other store doesn’t always have.”

Even with the widespread adoption of personal computers, many authors still choose to write and revise their novels by hand and only then transcribe the final version on a computer. It may be tempting to speculate about how a novel written this way would be affected if it had been exclusively typed instead, but each novel is a unique entity resulting from a specific set of circumstances. Therefore, _____

Which choice most logically completes the text?

- in order to increase their efficiency, authors who currently write their novels largely by hand should instead work only on a

A. computer.
- authors who do most of their drafting and revising by hand likely have more success than those who work entirely on a

B. computer.
- C. novels written by hand take less time to produce, on average, than novels written on a computer do.
- D. there is no way to reasonably evaluate how a work would be different if it had been written by other means.

Behavioral ecologists Will Wiggins, Sarah Bounds, and Shawn Wilder recently examined the behavior of field-collected and laboratory-reared bold jumping spiders (*Phidippus audax*). They found a positive association between experimental high-protein diets and aggressive behavior in field-collected males and a similar association between experimental high-lipid diets and aggressive behavior in lab-reared males; additionally, field-collected spiders showed a preference for flowers manipulated to display ultraviolet fluorescence, whereas lab-reared spiders showed a preference for flowers dyed with red food coloring that was not fluorescent. Wiggins, Bounds, and Wilder therefore concluded that _____

Which choice most logically completes the text?

- (A) rearing conditions likely affect the responses of bold jumping spiders to experimental stimuli.
- (B) being raised in a laboratory setting reduces aggression among male bold jumping spiders.
- (C) laboratory settings are more suitable for studying bold jumping spiders’ diets than their flower preferences.
- (D) experiments involving bold jumping spiders should make use of lab-reared individuals.
