SAT5 RW 1.1

According to a team of neuroeconomists from the University of Zurich, ease of decision making may be linked to communication between two brain regions, the prefrontal cortex and the parietal cortex. Individuals tend to be more decisive if the information flow between the regions is intensified, whereas they make choices more slowly when information flow is _____.

Which choice completes the text with the most logical and precise word or phrase?

- A. reduced
- B. evaluated
- C. determined
- D. acquired

ID: c977cfcf Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of how the flow of information between two regions of the brain may affect the ease of people’s decision making. In this context, "reduced" means decreased. The text presents the finding from a team of neuroeconomists that decision making may be connected to communication between the prefrontal cortex and the parietal cortex. In presenting this finding, the text suggests a contrast between people who tend to be more decisive and people who make decisions more slowly. According to the text, people tend to be more decisive when the flow of information between the two brain regions is intensified, or strengthened. On the other hand, this context suggests that people make choices more slowly when the flow of information between the two brain regions is decreased.

Choice B is incorrect because "evaluated" means assessed, which wouldn’t make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people’s ease of decision making varies based on the rate of information traveling between the regions, not based on an effort to assess the information. Choice C is incorrect because "determined" means judged or influenced, neither of which would make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people’s ease of decision making varies based on the rate of information traveling between the regions, not based on an effort to judge or influence the information. Choice D is incorrect because "acquired" means developed or attained, neither of which would make sense in context. According to the text, people tend to be more decisive when the flow of information between two brain regions is intensified, or strengthened. This suggests that people’s ease of decision making varies based on the rate of information traveling between the regions, not based on the development or attainment of the information.

Question Difficulty: Medium

Question ID 6c64a8f3

Assessment	Test	Domain	Skill	Difficulty

SAT5 RW 1.2

Ecologist Exequiel Ezcurra and colleagues found that the inhabitants of the Mexica empire used natural landmarks to track time with a high degree of _____. By observing the sun’s position in relation to various points on the mountains surrounding the Basin of Mexico, the Mexica were able to precisely identify the dates when significant events such as solstices occurred.

Which choice completes the text with the most logical and precise word or phrase?

- A. precariousness
- B. exactitude
- C. resilience
- D. inconspicuousness

ID: 6c64a8f3 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of the method the inhabitants of the Mexica empire used to track time. In this context, "exactitude" means precision. The text indicates that the Mexica used the sun’s position relative to various natural landmarks to track the passage of time, explaining that such methods allowed the Mexica to accurately determine the dates of important events such as solstices. This context supports the idea that the Mexica people were able to track time with a high degree of precision, or exactitude.

Choice A is incorrect because in this context "precariousness" would mean instability, and there’s nothing in the text to suggest that the method used by the Mexica people to track time was unstable or produced unstable results. Rather, the text indicates that the method yielded precise results, allowing the Mexica to accurately determine the dates of significant events. Choice C is incorrect because in this context "resilience" would mean persistence, and there’s nothing in the text to suggest that the Mexica worked stubbornly in spite of obstacles in order to track time. Choice D is incorrect because in this context "inconspicuousness" would mean discreteness, and there’s nothing in the text to suggest that the Mexica wanted to track time without being noticed.

SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 490b205f

SAT5 RW 1.3

In editor Lisa Yaszek’s introduction to her anthology *The Future Is Female! More Classic Science Fiction Stories by Women*, Yaszek identifies an increasing sense of _____ feminist mode of writing in the 1970s, in contrast to many woman-authored science fiction stories of the 1920s to 1960s whose politics were less deliberately signaled.

Which choice completes the text with the most logical and precise word or phrase?

- A. a prudently
- B. an overtly
- C. a cordially
- D. an inadvertently

ID: 490b205f Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of Yaszek’s introduction to her science fiction anthology. In this context "overtly" means openly or without concealment. The text draws a contrast between the lack of "deliberately signaled" political themes in women-authored science fiction from the 1920s to the 1960s and what Yaszek notes about women-authored science fiction from the 1970s. This contrast implies that the work from the 1970s did clearly reflect feminist political themes. In other words, the text indicates that unlike women who wrote science fiction in the 1920s to the 1960s, the women who wrote science fiction in the 1970s expressed overtly feminist themes.

Choice A is incorrect. In this context "prudently" would mean cautiously, which might plausibly describe the women who wrote science fiction from the 1920s to the 1960s, in that they tended to avoid revealing their political views; however, the text contrasts these authors with the women writing science fiction in the 1970s, thereby suggesting that the authors writing in the 1970s were not restrained in that way. Choice C is incorrect because in this context "cordially" would mean politely, and nothing in the text indicates that politeness was a significant factor for women writing science fiction either from the 1920s to the 1960s or in the 1970s. The text draws a contrast between the lack of "deliberately signaled" political themes in women-authored science fiction from the 1920s to the 1960s and what Yaszek notes about women-authored science fiction from the 1970s. It’s unclear how "less deliberately signaled" politics and an increasing sense of politeness toward feminism would constitute a meaningful contrast. Choice D is incorrect because in this context, "inadvertently" would mean unintentionally, and nothing in the text suggests that Yaszek thought the feminist elements of the women-authored science fiction from the 1970s arose without deliberate effort.

SAT5 RW 1.4

K.D. Leka and colleagues found that the Sun’s corona provides an advance indication of solar flares—intense eruptions of electromagnetic radiation that emanate from active regions in the Sun’s photosphere and can interfere with telecommunications on Earth. Preceding a flare, the corona temporarily exhibits increased brightness above the region where the flare is _____.

Which choice completes the text with the most logical and precise word or phrase?

- A. antecedent
- B. impending
- C. innocuous
- D. perpetual

ID: 0ed8f24f Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of advance indications of solar flares. In this context the word "impending" means imminent or approaching. The text mentions a study by Leka and colleagues that found that the Sun’s corona provides an advance indication of solar flares. The text then points out why such an advance indication would be useful—solar flares can interfere with communications on Earth—and concludes by describing the characteristic of the corona that gives warning of a solar flare. The text indicates that this characteristic—increased brightness in a particular region of the corona—comes before the appearance of the flare. Therefore, in context, the best answer would indicate that the flare is approaching, or impending.

Choice A is incorrect. The best answer would be one that indicates that the increased brightness of the Sun’s corona precedes the appearance of the flare. But if the flare were "antecedent," or previous, then the flare would instead precede the appearance of the increased brightness of the corona, a statement that is logically inconsistent. Choice C is incorrect. The word "innocuous," or harmless, does not logically complete the text; since solar flares can interfere with communications on Earth, they cannot reasonably be described as innocuous. Choice D is incorrect. If the solar flares have an advance indication of their appearance, then there must therefore be a time before the appearance of the flares when they do not exist. But the word "perpetual," or never-ending, would in context indicate that the flare exists at the same time as the advance indication provided by the Sun’s corona, which would not make logical sense.

Question Difficulty: Hard

Question ID d563bf65

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: d563bf65

SAT5 RW 1.5

The following text is adapted from Jean Webster’s 1912 novel *Daddy-Long-Legs*. The narrator is a young college student writing letters detailing her weekly experiences.

[The college is] organizing the Freshman basket-ball team and there’s just a chance that I shall make it. I’m little of course, but terribly quick and wiry and tough. While the others are hopping about in the air, I can dodge under their feet and grab the ball.

Which choice best states the main purpose of the text?

- A. To compare basketball with other sports
- B. To provide details of how to play basketball
- C. To state how players will be chosen for the basketball team
- D. To explain why the narrator thinks she might make the basketball team

ID: d563bf65 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text. In the first sentence of the text, the narrator states that she thinks there’s a chance she will become part of the basketball team at her college. She goes on to explain that she is "quick" and "tough." Based on these characteristics, she thinks she has a chance to join the team. Thus, the main purpose of the text is to explain why the narrator thinks she might make the basketball team.

Choice A is incorrect because the text focuses solely on basketball and doesn’t mention any other kinds of sports. Choice B is incorrect because the text doesn’t describe aspects of the game of basketball. Instead, it provides the narrator’s reasoning for thinking that she might make her school basketball team. Choice C is incorrect. Although the narrator explains why she thinks she will be chosen for the basketball team at her school, the text doesn’t go into the general decision-making process or the requirements for being picked for the team.

Question Difficulty: Easy

Question ID af43b0bd

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: af43b0bd

SAT5 RW 1.6

Researchers have long hypothesized that woolly mammoths were hunted to extinction in North America by humans using spears with grooved tips known as Clovis points. One anthropologist set out to test this hypothesis. Using a mechanical spear-thrower, he launched spears with Clovis points into mounds of clay—substitutes for the animals’ large bodies. The projectiles generally penetrated only a few inches into the clay, an amount insufficient to have harmed most woolly mammoths. This led the anthropologist to conclude that hunters using spears with Clovis points likely weren’t the principal drivers of the extinction.

Which choice best states the main purpose of the text?

- A. To argue for the significance of new findings amid an ongoing debate among researchers
- B. To discuss the advantages and disadvantages of the method used in an experiment
- C. To summarize two competing hypotheses and a major finding associated with each one
- D. To describe an experiment whose results cast doubt on an established hypothesis

ID: af43b0bd Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main purpose of the text, which is to describe an experiment whose results cast doubt on an established hypothesis. The text begins by noting that researchers have long believed that woolly mammoths were hunted to extinction in North America by humans using spears with Clovis points. The text then describes an experiment conducted by an anthropologist to test this hypothesis. According to the text, the results of the experiment led the anthropologist to conclude that hunters using spears with Clovis points likely weren’t the primary cause of the extinction. The anthropologist’s results cast doubt on the long-held hypothesis presented at the beginning of the text and suggest that woolly mammoths may have become extinct in North America due to some other cause.

Choice A is incorrect because there’s nothing in the text to suggest that researchers have been involved in an ongoing debate. On the contrary, the text suggests that most researchers agree on the cause of the woolly mammoth’s extinction in North America. Choice B is incorrect because the text never mentions any advantages or disadvantages of the method used in the experiment, focusing instead on the results achieved using that method. Choice C is incorrect because the text addresses only one hypothesis, that mammoths were hunted to extinction in North America by humans using spears with Clovis points. Rather than present a competing hypothesis, the text explains how one anthropologist designed an experiment to test this long-held hypothesis.

Question Difficulty: Medium

Question ID 9fe7aafa

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 9fe7aafa

SAT5 RW 1.7

The ancient writing system used in the Maya kingdoms of southern Mexico and Central America had a symbol for the number zero. The earliest known example of the symbol dates to more than 2,000 years ago. At that time, almost none of the writing systems elsewhere in the world possessed a zero symbol. And the use of zero in Mexico and Central America may be even more ancient. Some historians suggest that Maya mathematicians inherited it from the Olmec civilization, which flourished in the region 2,400–3,600 years ago.

According to the text, what do some historians suggest about Maya civilization?

- A. Maya civilization acquired the use of zero from the Olmec civilization.
- B. Maya civilization respected its historians more than it respected its mathematicians.
- C. Maya civilization was highly secretive about its intellectual achievements.
- D. Maya civilization tried to introduce its writing system to other civilizations.

ID: 9fe7aafa Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents information about Maya civilization that is supported by the text. The text states that the writing system used in the Maya kingdoms had a symbol for the number zero. It goes on to say that at the time of the zero symbol’s earliest example, more than 2,000 years ago, almost no other writing systems in the world featured such a symbol. The text also points out that some historians suggest that Maya mathematicians inherited the use of zero from the Olmec civilization, which existed in the same area as the Maya civilization at an earlier date. Thus, according to the text, some historians suggest that the Maya civilization acquired the use of zero from the Olmec civilization.

Choice B is incorrect because although the text mentions present-day historians and Maya mathematicians, it does not say anything about how much the Maya civilization respected its historians and mathematicians. Choice C is incorrect because the text does not indicate that the Maya civilization treated its use of the zero symbol, or any other intellectual achievements, as secrets to be kept from other civilizations. Choice D is incorrect because although the text mentions historians who suggest that the writing system of the Maya civilization inherited some features from the earlier Olmec civilization, the text does not describe any attempts of Maya civilization to introduce its writing system to other civilizations.

Question Difficulty: Medium

Question ID 995d55fd

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 995d55fd

SAT5 RW 1.8

A subject of much speculation, distinctive sets of parallel ridges mark the icy crust of Europa, Jupiter’s smallest moon. Researchers now claim that the ridges’ formation mechanism mirrors that of a strikingly similar pair on Greenland’s ice sheet. There, surface water seeped through fissures in the sheet and formed a water pocket that subsequently disrupted the overlying ice, forcing fragments of it upward and outward into peaks, as the pocket froze and expanded. Although Europa lacks liquid surface water, the same process could be driven by the moon’s subsurface ocean.

Which choice best states the main idea of the text?

- Researchers think that the ridges on Europa and the ridges in Greenland may have been formed by the same process
- A. even though Europa, unlike Greenland, doesn’t have liquid water on its surface.
- The primary difference between the ridges on Europa and the ridges in Greenland is that unlike the Europa ridges, the
- B. Greenland ridges are parallel.
- The pair of ridges found on Greenland’s ice sheet appear to have formed long before the recently discovered sets of
- C. ridges on Europa formed.
- Researchers don’t understand why Europa is marked by so many sets of ridges when the moon doesn’t have any liquid
- D. water on its surface that could have collected and expanded under the icy crust.

ID: 995d55fd Answer

Correct Answer: A

Rationale

Choice A is the best answer because it accurately states the main idea of the text. The text focuses on formations of parallel ice ridges on Jupiter’s moon Europa that are said to be formed by the same mechanism that formed a parallel set of ridges on Greenland’s ice sheet. The text indicates that in Greenland, water on the surface seeps to the lower portion of the ice sheet, resulting in uplift that creates the ridges, and it states that although Europa lacks liquid water on its surface, the same process could be driven by an ocean below Europa’s surface. In other words, the main idea of the text is that parallel ridges in the ice on Europa and Greenland are likely caused by similar processes even though in Greenland the process begins with liquid water on the surface while Europa lacks liquid water on the surface.

Choice B is incorrect because the text states outright that the ridges on Europa are parallel and furthermore refers to Greenland’s ridges as "strikingly similar" to those on Europa. Choice C is incorrect because the text makes no mention of when any of the ice ridges formed, either separately or relative to one another. Choice D is incorrect because the text does not indicate any uncertainty about the reason for the ice ridges on Europa and, in fact, clearly states that researchers now claim to know the mechanism that created the ridges.

Question Difficulty: Medium

Question ID 6540a976

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 6540a976

SAT5 RW 1.9

To understand how Paleolithic artists navigated dark caves, archaeologist M^a Ángeles Medina-Alcaide and her team tested different lighting methods in a cave in Spain using replicas of artifacts found in European caves with art. They used three different Paleolithic light sources—torches, animal-fat lamps, and fireplaces—determining that each likely had a specific purpose. For instance, the team learned that the animal-fat lamps were less useful than torches while walking because the lamps didn’t illuminate the cave floor.

Which choice best states the main idea of the text?

- A. Medina-Alcaide and her team’s study demonstrated that fireplaces were essential to the creators of Paleolithic cave art.
- Medina-Alcaide and her team discovered that Paleolithic cave artists in Spain used animal-fat lamps more often than
- B. they used torches.
- Medina-Alcaide and her team were reluctant to draw many conclusions from their study because of the difficulty they had
- C. replicating light sources based on known artifacts.
- Medina-Alcaide and her team tested Paleolithic light sources and learned some details about how Paleolithic artists
- D. traveled within dark caves.

ID: 6540a976 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text indicates that archaeologist M^a Ángeles Medina-Alcaide and her team used replicas of Paleolithic light sources to understand how Paleolithic artists moved through dark caves. The researchers learned, for example, that torches were more helpful for moving through caves than animal-fat lamps were. Thus, the main idea of the text is that Medina-Alcaide and her team tested Paleolithic light sources and learned some details about how Paleolithic artists traveled within dark caves.

Choice A is incorrect because the text doesn’t address the usefulness of fireplaces for Paleolithic cave artists; it only mentions fireplaces briefly as one of the three lighting methods the researchers tested. Choice B is incorrect because the text doesn’t discuss how often Paleolithic cave artists used each kind of light source tested. Although the text does compare animal-fat lamps with another lighting method, the point of that comparison is that animal-fat lamps were less useful than torches when walking, not that one method was used more often than another. Choice C is incorrect because the text doesn’t discuss either how difficult it was for Medina-Alcaide and her team to replicate light sources or how the team felt about drawing conclusions from their study. Instead, the text reveals that the team was able to conclude that each light source likely had a distinct purpose.

Question Difficulty: Medium

SAT5 RW 1.10

Total Science Research Submissions
by Topic, 2016–2019

A student is researching the trends in the topics submitted to a national science fair for high school students. The graph shows the number of submissions by topic that were made each year. Based on the data in the graph, the student claims that there were more medicine and health research topics submitted in 2019 than in any other year.

Which choice most effectively uses data from the graph to support the underlined claim?

- In 2016, the number of cellular and molecular biology topic submissions was the same as the number of animal science A. topic submissions.
- In 2019, there were more physics and space science topic submissions than there were medicine and health topic B. submissions.
- C. The lowest number of animal science topic submissions in a year was approximately 95 in 2016.
- D. The highest number of medicine and health topic submissions during the period shown is approximately 285 in 2019.

ID: 800771e5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it effectively uses data from the graph to support the underlined claim that more medicine and health topics were submitted to a national science fair in 2019 than in any of the other years shown. This choice indicates that the approximately 285 medicine and health topics submitted in 2019 are more than the number of medicine and health submissions in any other year shown—a description that is supported by information in the graph, which shows that medicine and health topic submissions were below 250 in 2016, 2017, and 2018, but above 250 (approximately 285 submissions) in 2019.

Choice A is incorrect because it doesn't support the underlined claim or accurately reflect the information in the graph. This choice refers to 2016 and discusses cellular and molecular biology and animal science, whereas the underlined claim refers to 2019 and discusses medicine and health. Moreover, the claim that in 2016 there were equal numbers of submissions in the cellular and molecular biology category and in the animal science category is contradicted by the graph, which shows approximately 200 submissions and 50 submissions, respectively, for those categories in 2016. Choice B is incorrect because it doesn't accurately reflect the information in the graph. This choice claims that in 2019 there were more physics and space submissions than there were medicine and health submissions, but the graph shows that there were approximately 100 space and science submissions that year and approximately 285 medicine and health submissions. Choice C is incorrect because it doesn't accurately reflect the information in the graph or support the underlined claim about medicine and health research topics. This choice claims that there were approximately 95 submissions for the animal science category in 2016, but the graph shows that the number was closer to 50 in 2016.

Question Difficulty: Easy

Question ID 57303718

SAT5 RW 1.11

“Looking Back on Girlhood” is an 1892 short story by Sarah Orne Jewett. In the story, the narrator explains that she prefers her hometown to other places she has visited: _____

Which quotation from “Looking Back on Girlhood” most effectively illustrates this claim?

- A. “There is always something fresh, something to be traced or discovered, something particularly to be remembered.”
- “Two large rivers join just below the village at the head of tide-water, and these, with the great inflow from the sea, make a B. magnificent stream, bordered by lovely green fields that slope gently to long lines of willows at the water’s edge.”
- “I have had a good deal of journeying in my life, and taken great delight in it, but I have never taken greater delight than in C. my rides and drives and tramps and voyages within the borders of my native town.”
- D. “There is never-ending pleasure in making one’s self familiar with such a region.”

ID: 57303718 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most effectively illustrates the claim that the narrator prefers her hometown to other places she has visited. In the quotation, the narrator compares how she feels about places she has traveled to how she feels about the town she’s from. The narrator states that although the many journeys she has made in her lifetime have brought her much pleasure, she has gained the most enjoyment from her experiences inside the borders of her hometown.

Choice A is incorrect because it doesn’t express that the narrator likes her hometown better than other places she has visited; instead, the quotation describes something unspecified in positive terms, saying it continues to offer new things to explore and remember. Choice B is incorrect. Although the quotation praises a landscape surrounding a village, it doesn’t specify that this village is the narrator’s hometown, nor does it express a preference for this village over other places the narrator has visited. Choice D is incorrect. Although the quotation describes enjoyment from getting to know a region, it doesn’t compare the narrator’s feelings for this region with her feelings for her hometown.

Question Difficulty: Medium

Question ID f2b3b53b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Command of Evidence	

ID: f2b3b53b

SAT5 RW 1.12

External shopping cues are a type of marketing that uses obvious messaging—a display featuring a new product, for example, or a “buy one, get one free” offer—to entice consumers to make spontaneous purchases. In a study, data scientist Sam K. Hui and colleagues found that this effect can also be achieved with a less obvious cue: rearranging a store’s layout. The researchers explain that trying to find items in new locations causes shoppers to move through more of the store, exposing them to more products and increasing the likelihood that they’ll buy an item they hadn’t planned on purchasing.

Which response from a survey given to shoppers who made a purchase at a retail store best supports the researchers’ explanation?

- “I needed to buy some cleaning supplies, but they weren’t in their regular place. While I was looking for them, I saw this interesting notebook and decided to buy it, too.”

“I didn’t buy everything on my shopping list today. I couldn’t find a couple of the items in the store, even though I looked all over for them.”

“The store sent me a coupon for a new brand of soup, so I came here to find out what kinds of soup that brand offers. I decided to buy a few cans because I had the coupon.”

“This store is larger than one that’s closer to where I live, and it carries more products. I came here to buy some things that the other store doesn’t always have.”

ID: f2b3b53b Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best supports the researchers' explanation of the results of rearranging a store's layout. According to the text, Sam K. Hui and colleagues found that rearranging a store's layout can encourage customers to make spontaneous purchases. The text states that the researchers explain that a change in layout causes shoppers to hunt for items' new locations, which exposes the shoppers to more products and increases the likelihood that they'll make an unplanned purchase. This quotation from a surveyed shopper indicates that the shopper spontaneously purchased a notebook while looking for cleaning supplies that weren't in their usual place. The quotation therefore supports the researchers' explanation that rearranging a store's layout can lead shoppers to make unanticipated purchases.

Choice B is incorrect because it doesn't support the researchers' explanation that rearranging a store's layout can lead shoppers to make unanticipated purchases. Instead of attributing an unplanned purchase to a change in layout, the quotation notes that the shopper searched for but couldn't find some items, and as a result the shopper purchased less, not more, than what was anticipated. Choice C is incorrect because the quotation attributes what was purchased to coupons that the shopper received, not to a new store layout. Thus, the quotation doesn't support the researchers' explanation that rearranging a store's layout can lead shoppers to make unanticipated purchases. Choice D is incorrect because the quotation attributes what was purchased to the size and stock of the store, not to a new store layout. The shopper simply purchased products that the shopper wanted in a particular store because other stores didn't carry those products, so the quotation doesn't support the researchers' explanation that rearranging a store's layout can lead shoppers to make spontaneous purchases.

SAT5 RW 1.13

Even with the widespread adoption of personal computers, many authors still choose to write and revise their novels by hand and only then transcribe the final version on a computer. It may be tempting to speculate about how a novel written this way would be affected if it had been exclusively typed instead, but each novel is a unique entity resulting from a specific set of circumstances. Therefore, _____

Which choice most logically completes the text?

- in order to increase their efficiency, authors who currently write their novels largely by hand should instead work only on a

A. computer.
- authors who do most of their drafting and revising by hand likely have more success than those who work entirely on a

B. computer.
- C. novels written by hand take less time to produce, on average, than novels written on a computer do.
- D. there is no way to reasonably evaluate how a work would be different if it had been written by other means.

ID: 28dfc05a Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents the conclusion that most logically follows from the text’s discussion of the means authors use to write and revise their novels. After stating that many authors still choose to draft novels by hand even though computers are now widely used, the text acknowledges the speculation that the opposite choice—using only a computer—would have had an effect on such novels. However, the text then points out that every novel is the singular result of a combination of the particular conditions surrounding its creation. This suggests that it isn’t possible to determine the effect of any single condition (such as the means of writing) on its own; thus, there would be no way to reasonably evaluate how a novel would have turned out differently if it had been written by other means.

Choice A is incorrect because the text doesn’t suggest that it’s more efficient to write a novel on a computer than to write it by hand; it doesn’t address efficiency at all. Therefore, it isn’t logical to conclude that authors who currently choose to write novels largely by hand should instead work only on a computer to increase their efficiency. Choice B is incorrect because the text doesn’t suggest anything about how successful authors are, regardless of the means by which they choose to write; therefore, it isn’t logical to conclude that authors who write largely by hand are likely to be more successful than those who work only on a computer. Choice C is incorrect because the text makes no mention of the time it takes to produce a novel, regardless of the means by which it’s written; therefore, it isn’t logical to conclude that novels written by hand take less time on average to produce than those written on a computer do.

SAT5 RW 1.14

Behavioral ecologists Will Wiggins, Sarah Bounds, and Shawn Wilder recently examined the behavior of field-collected and laboratory-reared bold jumping spiders (*Phidippus audax*). They found a positive association between experimental high-protein diets and aggressive behavior in field-collected males and a similar association between experimental high-lipid diets and aggressive behavior in lab-reared males; additionally, field-collected spiders showed a preference for flowers manipulated to display ultraviolet fluorescence, whereas lab-reared spiders showed a preference for flowers dyed with red food coloring that was not fluorescent. Wiggins, Bounds, and Wilder therefore concluded that _____

Which choice most logically completes the text?

- (A)** rearing conditions likely affect the responses of bold jumping spiders to experimental stimuli.
- (B)** being raised in a laboratory setting reduces aggression among male bold jumping spiders.
- (C)** laboratory settings are more suitable for studying bold jumping spiders’ diets than their flower preferences.
- (D)** experiments involving bold jumping spiders should make use of lab-reared individuals.

Correct Answer: A

Explanation

Choice A is the best answer because it most logically completes the text’s discussion of the behavior observed in field-collected and laboratory-reared bold jumping spiders when the spiders are exposed to certain experimental stimuli. The text indicates that researchers were exposing two groups of male bold jumping spiders (field-collected and laboratory-reared) to different stimuli and observing their subsequent behaviors. The text goes on to detail the observations made by the research team: field-collected spiders displayed aggressive behaviors when fed a high-protein diet and preferred flowers manipulated to display ultraviolet fluorescence, while laboratory-reared spiders displayed aggressive behaviors when fed a high-lipid diet and preferred nonfluorescent flowers that were dyed red. It can be inferred from the text that the rearing conditions (field versus laboratory) of the spiders was the independent variable for the experiment. Thus, it follows that the conditions in which the spiders were reared likely affect their response to the different experimental stimuli presented.

Choice B is incorrect because the text indicates that both groups of male bold jumping spiders (field-collected and lab-reared) displayed aggressive behaviors depending on the experimental diet they were exposed to. Additionally, the researchers observed the response of the spiders to different experimental stimuli, not the effect of rearing location on male spider aggression. Choice C is incorrect. The experiment detailed in the text compared two groups of bold jumping spiders reared in different settings—a lab setting, in which spiders were fed a high-lipid diet, and a field setting, in which spiders were fed a high-protein diet. The text does not speculate about whether the laboratory setting was more suitable to studying some aspects of the spiders’ behavior than to studying other aspects of it. Choice D is incorrect. Although the experiment discussed in the text involved both lab-reared and field-collected specimens of the bold jumping spider, the text never suggests that lab-reared specimens were somehow superior to field-collected specimens or necessarily recommends the use of lab-reared specimens in experiments.

SAT5 RW 1.15

In forecasting weather events, meteorologists sometimes discuss the role of atmospheric rivers. What are atmospheric rivers, and how ____ Part of the water cycle, atmospheric rivers are narrow channels of moisture moving through the atmosphere. In certain conditions, these “rivers” can release some of their moisture as precipitation.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. do they affect our weather.
- B. they do affect our weather.
- C. do they affect our weather?
- D. they do affect our weather?

ID: 39ac6498 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The convention being tested is end-of-sentence punctuation. This choice correctly uses a question mark to punctuate the coordinated interrogative clauses "What are atmospheric rivers" and "how do they affect our weather," both of which ask direct questions.

Choice A is incorrect because a period can't be used in this way to punctuate an interrogative clause, such as "how do they affect our weather," at the end of a sentence. Choice B is incorrect because the structure requires an interrogative clause and a question mark at the end of the sentence. Choice D is incorrect because the structure requires an interrogative clause at the end of the sentence.

SAT	Reading and Writing	Standard English Conventions	Form, Structure, and Sense	

ID: eeb14722

SAT5 RW 1.16

The soundtrack to Mira Nair’s 1991 film *Mississippi Masala* expressively captures the clashing of cultures that happens when _____ (a young Indian woman from Uganda and a young African American man from Mississippi) meet. Featured throughout the film are songs from Uganda’s Afrigo Band, the Indian composer L. Subramaniam, and the Mississippi blues musician Sam Chatmon.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. it’s two protagonists
- B. its two protagonist’s
- C. it’s two protagonist’s
- D. its two protagonists

ID: eeb14722 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The conventions being tested are the use of possessive determiners and the use of plural nouns. The singular possessive determiner "its"—which agrees in number with the singular noun phrase "Mira Nair’s 1991 film *Mississippi Masala*"—and the plural noun "protagonists" correctly indicate that Nair’s film has multiple protagonists.

Choice A is incorrect because "it’s" is the contraction for "it is," not a possessive determiner. Choice B is incorrect because the context requires the plural noun "protagonists," not the singular possessive noun "protagonist’s." Choice C is incorrect because the context requires the possessive determiner "its" and the plural noun "protagonists," not the contraction "it’s" or the singular possessive noun "protagonist’s."

Question Difficulty: Medium

SAT5 RW 1.17

Julia Alvarez’s 1994 novel *In the Time of the Butterflies*, a fictionalized account of the lives of the Mirabal _____ can serve as a starting point for those wanting to explore how the rule of dictator Rafael Trujillo has been represented in Dominican American literature.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. sisters, and
- B. sisters and
- C. sisters,
- D. sisters

ID: a3e87535 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The convention being tested is the punctuation of a supplementary element within a sentence. The comma after "sisters" pairs with the comma after "*Butterflies*" to separate the supplementary element "a fictionalized account of the lives of the Mirabal sisters" from the rest of the sentence. This supplementary element functions to describe the novel *In the Time of the Butterflies*, and the pair of commas indicates that this element could be removed without affecting the grammatical coherence of the sentence.

Choice A is incorrect because a comma and conjunction can’t be used in this way to separate the supplementary element from the rest of the sentence. Choice B is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence. Choice D is incorrect because it fails to use appropriate punctuation to separate the supplementary element from the rest of the sentence.

Question Difficulty: Medium

Question ID 435809d8

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Standard English Conventions	Boundaries	■ ■ ■

ID: 435809d8

SAT5 RW 1.18

On March 23, 2021, a gust of wind wreaked havoc on global trade. *Ever Given*, an international shipping container vessel, became lodged in Egypt’s Suez Canal, a major shipping route between Europe and Asia. The vessel took six days to _____ it’s as heavy as two thousand blue whales when fully loaded.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. dislodge in part due to its sheer size,
- B. dislodge, in part due to its sheer size:
- C. dislodge, in part due to its sheer size,
- D. dislodge, in part, due to its sheer size

ID: 435809d8 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The convention being tested is punctuation between main clauses and a supplementary element. This choice correctly uses a comma to mark the boundary between the main clause ("The vessel took six days to dislodge") and the supplementary element ("in part due to its sheer size") that provides additional information on why the vessel was difficult to dislodge. Additionally, this choice correctly uses a colon to introduce another main clause that describes the vessel’s size ("it’s as heavy as two thousand blue whales when fully loaded").

Choice A is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between two main clauses ("The vessel...size" and "it’s...loaded"). Additionally, it fails to mark the boundary between the main clause ("The vessel took six days to dislodge") and the supplementary element ("in part due to its sheer size"). Choice C is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between two main clauses ("The vessel...size" and "it’s...loaded"). Choice D is incorrect because it results in a run-on sentence. The two main clauses ("The vessel...size" and "it’s...loaded") are fused without punctuation and/or a conjunction.

SAT5 RW 1.19

Woven from recycled yarn and hand tufted using a carpet weaving technique passed down by the artist’s Turkish grandmother, _____ so lush and tactilely inviting that you are tempted to reach out and touch them.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. the topological tapestries of Argentine textile artist Alexandra Kehayoglou are
- B. the Argentine textile artist Alexandra Kehayoglou creates topological tapestries that are
- C. when she creates her topological tapestries, Argentine textile artist Alexandra Kehayoglou makes them
- D. Alexandra Kehayoglou is an Argentine textile artist whose topological tapestries are

ID: b369d54c Answer

Correct Answer: A

Rationale

Choice A is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "topological tapestries" the subject of the sentence and places it immediately after the modifying phrase "woven... grandmother." In doing so, this choice clearly establishes that the topological tapestries—and not another noun in the sentence—are being described as woven from recycled yarn and hand tufted.

Choice B is incorrect because it results in a dangling modifier. The placement of the noun phrase "Argentine textile artist Alexandra Kehayoglou" immediately after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted. Choice C is incorrect because it results in a dangling modifier. The placement of the pronoun "she" and the noun phrase "Argentine textile artist Alexandra Kehayoglou" after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted. Choice D is incorrect because it results in a dangling modifier. The placement of the noun "Alexandra Kehayoglou" immediately after the modifying phrase illogically suggests that Kehayoglou is woven from recycled yarn and hand tufted.

SAT5 RW 1.20

Jamaican British artist Willard Wigan is known for his remarkable _____ so small that they are best viewed through a microscope, Wigan’s sculptures are made from tiny natural materials, such as spiderweb strands.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A. microsculptures creations
- B. microsculptures, creations
- C. microsculptures. Creations
- D. microsculptures and creations

ID: 940ff6f7 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The convention being tested is punctuation between sentences. In this choice, the period is used to correctly mark the boundary between one sentence ("Jamaican...microsculptures") and another ("Creations...strands"). The noun phrase beginning with "creations" modifies the subject of the next sentence, "Wigan’s sculptures."

Choice A is incorrect because it results in a run-on sentence. The sentences ("Jamaican...microsculptures" and "Creations...strands") are fused without punctuation and/or a conjunction. Choice B is incorrect because it results in a comma splice. A comma can’t be used in this way to mark the boundary between sentences. Choice D is incorrect. Without a comma preceding it, the conjunction "and" can’t be used in this way to join sentences.

SAT5 RW 1.21

After appropriate permissions are granted, a typical archaeological dig begins with a surveyor making a detailed grid of the excavation site. Then, the site is carefully dug, and any artifacts found are recorded and mapped onto the site grid. _____ the artifacts are removed, cataloged, and analyzed in a laboratory.

Which choice completes the text with the most logical transition?

- A. For instance,
- B. On the contrary,
- C. Earlier,
- D. Finally,

ID: 911c7a87 Answer

Correct Answer: D

Rationale

Choice D is the best answer. "Finally" logically signals that the actions in this sentence—the removal, cataloging, and analysis of artifacts—are the next and final steps in a process, following the previous actions of surveying, digging, recording, and mapping.

Choice A is incorrect because "for instance" illogically signals that the actions in this sentence are an example of the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process. Choice B is incorrect because "on the contrary" illogically signals that the actions in this sentence are directly opposed to the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process. Choice C is incorrect because "earlier" illogically signals that the actions in this sentence occur before the actions in the previous sentence. Instead, the removal, cataloging, and analysis of artifacts are the next and final steps in a process.

Question Difficulty: Easy

In 1949, Frank Zamboni developed an ice rink resurfacing machine. As Zamboni’s machine moved along the rink’s surface, it first scraped off the top layer of ice. _____ it sprayed water into the deep grooves left behind by customers’ skates. Lastly, it smoothed over the newly formed ice.

Which choice completes the text with the most logical transition?

- A. For example,
- B. Next,
- C. Similarly,
- D. In contrast,

ID: a204d618 Answer

Correct Answer: B

Rationale

Choice B is the best answer. "Next" logically signals that the action in this sentence—the water spraying—is the next step in the resurfacing process, following the ice scraping mentioned in the previous sentence.

Choice A is incorrect because "for example" illogically signals that the action in this sentence is an example of the action in the previous sentence. Instead, the water spraying is the next step in a process that begins with the ice scraping. Choice C is incorrect because "similarly" illogically signals that the action in this sentence is similar to the action in the previous sentence. Instead, the water spraying is the next step in a process that begins with the ice scraping. Choice D is incorrect because "in contrast" illogically signals that the action in this sentence contrasts with the action in the previous sentence. Instead, the water spraying is the next step in a process that begins with the ice scraping.

Question Difficulty: Easy

Question ID 60917233

SAT5 RW 1.23

In the 1880s, inventor Lewis Latimer improved upon Thomas Edison’s design for the electric light bulb. _____ Latimer made the light bulb more durable by placing cardboard around its carbon filament. With this innovation, Latimer became the first Black inventor to contribute to the electrification of the world.

Which choice completes the text with the most logical transition?

- A. Soon,
- B. Regardless,
- C. However,
- D. Specifically,

ID: 60917233 Answer

Correct Answer: D

Rationale

Choice D is the best answer. "Specifically" logically signals that the information in this sentence—Latimer making the light bulb more durable—provides a specific detail elaborating on the more general claim in the previous sentence that Latimer improved the light bulb.

Choice A is incorrect because "soon" illogically signals that the information in this sentence occurred shortly after Latimer improved the light bulb. Instead, Latimer making the bulb more durable was the specific improvement. Choice B is incorrect because "regardless" illogically signals that the information in this sentence is true despite the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim. Choice C is incorrect because "however" illogically signals that the information in this sentence contrasts with the previous claim about Latimer. Instead, the information about Latimer making the bulb more durable provides a specific detail elaborating on that claim.

SAT5 RW 1.24

Jeffrey Gibson’s sculptural object *KNOW YOUR MAGIC, BABY*, an Everlast-brand exercise bag embroidered with multicolored beads and a fringe associated with the dances of the Ojibwe people, stitches together—literally and figuratively—recognizable symbols from both Native and non-Native cultures. _____ Gibson’s piece also blurs the distinction between contemporary art and traditional crafts.

Which choice completes the text with the most logical transition?

- A. Conversely,
- B. In so doing,
- C. For instance,
- D. In particular,

ID: 273c2f12 Answer

Correct Answer: B

Rationale

Choice B is the best answer. "In so doing" logically signals that the information in this sentence about Gibson’s piece—that it blurs the distinction between contemporary art and traditional crafts—is a result or consequence of the piece’s blending of particular Native and non-Native cultural symbols.

Choice A is incorrect. "Conversely" illogically signals that the information in this sentence contrasts with the previous information about the blending of particular cultural symbols in Gibson’s piece. Instead, it presents a result or consequence of that information. Choice C is incorrect. "For instance" illogically signals that this sentence provides an example supporting the previous information about the blending of particular cultural symbols in Gibson’s piece. Instead, it presents a result or consequence of that information. Choice D is incorrect. "In particular" illogically signals that this sentence provides specific details elaborating on the previous information about the blending of particular cultural symbols in Gibson’s piece. Instead, it presents a result or consequence of that information.

Question Difficulty: Medium

Question ID e3bbf2bf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis

SAT5 RW 1.25

While researching a topic, a student has taken the following notes:

- In World War I, US soldiers who were members of the Choctaw Nation in Oklahoma participated in the Choctaw Code Talkers program.
- The Choctaw Code Talkers were trained to relay coded military information in their native language.
- In World War II, the US Army recruited Navajo (Diné) soldiers to transmit coded messages in their native language.
- These soldiers were known as the Navajo Code Talkers.

The student wants to emphasize a similarity between the Choctaw Code Talkers and the Navajo Code Talkers. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- US soldiers who were members of the Choctaw Nation in Oklahoma used their native language to relay coded information.
- In World War II, one group of Navajo (Diné) soldiers was known as the Navajo Code Talkers.
- Both the Choctaw Code Talkers and the Navajo Code Talkers transmitted coded military messages in the soldiers’ native languages.
- The Choctaw Code Talkers, not the Navajo Code Talkers, served in World War I.

ID: e3bbf2bf Answer

Correct Answer: C

Rationale

Choice C is the best answer. The sentence emphasizes a similarity between the Choctaw Code Talkers and the Navajo Code Talkers by explaining that both groups used their native languages to transmit coded messages for the military.

Choice A is incorrect. The sentence describes the Choctaw Code Talkers; it doesn’t emphasize a similarity between the Choctaw Code Talkers and the Navajo Code Talkers. Choice B is incorrect. The sentence introduces the Navajo Code Talkers; it doesn’t emphasize a similarity between the Choctaw Code Talkers and the Navajo Code Talkers. Choice D is incorrect. The sentence emphasizes a difference between the Choctaw Code Talkers and the Navajo Code Talkers; it doesn’t emphasize a similarity.

Question Difficulty: Easy

Question ID 4c43bf61

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: 4c43bf61

SAT5 RW 1.26

While researching a topic, a student has taken the following notes:

- The International Center for the Arts of the Americas (ICAA) is directed by Mari Carmen Ramírez.
- Ramírez oversaw an initiative to create an online archive of historical documents related to the history of Latin American and Latino visual art.
- The ICAA digitized over 10,000 documents, including the writings of Latin American and Latino artists and critics.
- The creation of the archive didn’t require historical documents to be removed from their countries of origin.
- Scholars now have more access to these documents.

The student wants to explain an advantage of the ICAA’s archive being digital. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Over 10,000 documents related to the history of Latin American and Latino visual art are part of the ICAA archive.
By offering online versions of historical documents, the ICAA’s archive provides more access to these materials without removing them from their countries of origin.
- B. Among the historical documents in the ICAA’s archive are the writings of Latin American and Latino artists and critics.
The ICAA’s director, Mari Carmen Ramírez, oversaw the creation of an online archive of historical documents related to Latin American and Latino visual art.

ID: 4c43bf61 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The sentence explains an advantage of the ICAA’s archive being digital, noting that the archive provides more access to historical documents since they don’t have to be removed from their countries of origin.

Choice A is incorrect. The sentence emphasizes the number of documents in the ICAA archive; it doesn’t explain an advantage of the archive being digital. Choice C is incorrect. The sentence notes the types of historical documents the ICAA’s archive contains; it doesn’t explain an advantage of the archive being digital. Choice D is incorrect. The sentence identifies who oversaw the creation of the ICAA’s online archive; it doesn’t explain an advantage of the archive being digital.

Question Difficulty: Medium

Question ID 2c7dced2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Expression of Ideas	Rhetorical Synthesis	

ID: 2c7dced2

SAT5 RW 1.27

While researching a topic, a student has taken the following notes:

- Sister Rosetta Tharpe (1915–1973) was a gospel musician.
- She was known for her passionate vocals and electric guitar performances.
- In 2018, Tharpe was inducted into the Rock and Roll Hall of Fame for her major impact on the genre.
- According to songwriter Roxie Moore, “[Tharpe] would sing until you cried and then she would sing until you danced for joy.”
- According to guitarist Celisse Henderson, “Tharpe is the unquestioned founding mother of rock ‘n’ roll.”

The student wants to use a quotation to support a claim about Tharpe’s contribution to rock ‘n’ roll. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- Gospel musician Sister Rosetta Tharpe had a major impact on rock ‘n’ roll, and she was known for her passionate electric guitar performances.
- Celisse Henderson believes that Sister Rosetta Tharpe had a major impact on the development of rock ‘n’ roll.
- Sister Rosetta Tharpe had such a major impact on rock ‘n’ roll that Celisse Henderson called her “the unquestioned founding mother” of the genre.
- A gospel musician, Sister Rosetta Tharpe had the ability to “sing until you cried” and also “until you danced for joy,” according to Roxie Moore.

ID: 2c7dced2 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The sentence uses the quotation from Henderson to support a claim about Tharpe’s contribution to rock ‘n’ roll, noting that the impact Tharpe had on the genre led Henderson to call her “the unquestioned founding mother of rock ‘n’ roll.”

Choice A is incorrect. While the sentence makes the claim that Tharpe had a major impact on rock ‘n’ roll, it doesn’t use a quotation to support this claim. Choice B is incorrect. The sentence presents Henderson’s opinion that Tharpe had a major impact on rock ‘n’ roll, but it doesn’t use a quotation to support this claim. Choice D is incorrect. While the sentence includes a quotation about audience reactions to Tharpe’s music, the sentence describes Tharpe as a gospel musician; it doesn’t support a claim about her contribution to rock ‘n’ roll.

Question Difficulty: Medium
