The following text is adapted from Elizabeth von Arnim’s 1922 novel *The Enchanted April*. Mrs. Wilkins and her friend Rose are traveling in Italy.

“I’m going to have one of these gorgeous oranges,” said Mrs. Wilkins, staying where she was and reaching across to a black bowl piled with them. “Rose, how can you resist them. Look—have this one. Do have this beauty—” And she held out a big one.

As used in the text, what does the phrase “reaching across to” most nearly mean?

- A. Joining with
- B. Gaining on
- C. Stretching toward
- D. Arriving at

The following text is from Paul Laurence Dunbar’s 1913 poem “The Poet and His Song.”

A song is but a little thing, And yet what joy it is to sing! In hours of toil it gives me zest, And when at eve I long for rest;
When cows come home along the bars, And in the fold I hear the bell, As Night, the shepherd, herds his stars,
I sing my song, and all is well.

Which choice best states the main purpose of the text?

- A. To convey how engaging in song makes the speaker feel
- B. To compare the speaker to a singing shepherd
- C. To portray the speaker’s excitement about farming
- D. To describe the pieces of music the speaker enjoys hearing

SAT5 RW 2.7

In the late 1800s, Spanish-language newspapers flourished in cities across Texas. San Antonio alone produced eleven newspapers in Spanish between 1890 and 1900. But El Paso surpassed all other cities in the state. This city produced twenty-two newspapers in Spanish during that period. El Paso is located on the border with Mexico and has always had a large population of Spanish speakers. Thus, it is unsurprising that this city became such a rich site for Spanish-language journalism.

Which choice best states the main purpose of the text?

- A. To compare Spanish-language newspapers published in Texas today with ones published there during the late 1800s
- B. To explain that Spanish-language newspapers thrived in Texas and especially in El Paso during the late 1800s
- To argue that Spanish-language newspapers published in El Paso influenced the ones published in San Antonio during

C. the late 1800s
- D. To explain why Spanish-language newspapers published in Texas were so popular in Mexico during the late 1800s

Text 1

In 1954 George Balanchine choreographed a production of *The Nutcracker*, a ballet by Pyotr Ilyich Tchaikovsky. It has since become a tradition for hundreds of dance companies in North America to stage *The Nutcracker* each year. But the show is stuck in the past, with an old-fashioned story and references, so it should no longer be produced. Ballet needs to create new traditions if it wants to stay relevant to contemporary audiences.

Text 2

The Nutcracker is outdated, but it should be kept because it’s a holiday favorite and provides substantial income for some dance companies. Although it can be behind the times, there are creative ways to update the show. For example, Debbie Allen successfully modernized the story. Her show *Hot Chocolate Nutcracker* combines ballet, tap, hip-hop, and other styles, and it has been gaining in popularity since it opened in 2009.

Based on the texts, how would the author of Text 2 most likely respond to the underlined claim in Text 1?

- By questioning the idea that the story of *The Nutcracker* is stuck in the past and by rejecting the suggestion that
- A. contemporary audiences would enjoy an updated version
- By agreeing that contemporary audiences have largely stopped going to see performances of *The Nutcracker* because it’s
- B. so old-fashioned
- By pointing out that most dance companies could increase their incomes by offering modernized versions of *The*
- C. *Nutcracker*
- By suggesting that dance companies should consider offering revised versions of *The Nutcracker* instead of completely
- D. rejecting the show

Male túngara frogs make complex calls to attract mates, but their calls also attract frog-biting midges, insects that feed on the frogs’ blood. Researchers Ximena Bernal and Priyanka de Silva wondered if the calls alone are sufficient for midges to locate the frogs or if midges use carbon dioxide emitted by frogs as an additional cue to their prey’s whereabouts, like mosquitoes do. In an experiment, the researchers placed two midge traps in a túngara frog breeding area. One trap played recordings of túngara frog calls and the other released carbon dioxide along with playing the calls. Bernal and de Silva concluded that carbon dioxide does not serve as an additional cue to frog-biting midges.

Which finding from the experiment, if true, would most directly support Bernal and de Silva’s conclusion?

Only a small number of midges were found in the traps, though the majority were found in the trap that played calls and

A. released carbon dioxide.

Midges entered the trap that released carbon dioxide and played calls only during or immediately after periods of carbon

B. dioxide release.

C. More midges were found in the trap that only played calls than in the trap that played calls and released carbon dioxide.

The trap that released carbon dioxide and played calls attracted few midges when carbon dioxide concentrations were

D. low but attracted many midges when carbon dioxide concentrations were high.

California Condor Populations
2014–2020

The California Condor Recovery Program is working to protect this large, rare American vulture from extinction. The program captured 27 wild condors in 1987 in order to protect and breed them. Captive birds have been reintroduced into the wild since 1992. Although the California condor is still a rare species, many biologists claim that the program has been reasonably successful.

Which choice best describes data from the graph that support the biologists’ claim?

- A. The number of captive California condors steadily decreased between 2014 and 2020.
- B. The numbers of California condors living both in captivity and in the wild decreased only slightly from 2019 to 2020.

The difference between the number of captive and wild California condors remained relatively steady between 2014 and 2017.

The number of wild California condors increased overall from 2014 to 2020 and exceeded the number of those living in captivity.

Annual Spending by International
Tourists in Four Countries (in billions of
US dollars)

Country	2016	2017	2018
South Korea	\$21.0	\$17.2	\$23.1
Japan	\$33.5	\$37.0	\$45.3
Thailand	\$48.5	\$57.1	\$61.4
Malaysia	\$19.7	\$20.3	\$21.8

One measure of international tourism is how much money visitors from abroad spend in a country. A student writing a report about tourism in several Asian countries notes that among the countries in the table, most had annual increases in international tourism revenue in 2017 and 2018, but that trend wasn’t universal. For example, _____

Which choice most effectively uses data from the table to complete the example?

- _____ in each year shown, the revenue from tourism by residents of those countries was greater than the revenue from international tourism.
- A. international tourism.
- B. Japan’s international tourism revenue was higher in 2016 than it was in 2018.
- C. South Korea’s annual international tourism revenue decreased from 2016 to 2017.
- D. in each year shown, Thailand had higher international tourism income than any of the other countries.

Fish whose DNA has been modified to include genetic material from other species are known as transgenic. Some transgenic fish have genes from jellyfish that result in fluorescence (that is, they glow in the dark). Although these fish were initially engineered for research purposes in the 1990s, they were sold as pets in the 2000s and can now be found in the wild in creeks in Brazil. A student in a biology seminar who is writing a paper on these fish asserts that their escape from Brazilian fish farms into the wild may have significant negative long-term ecological effects.

Which quotation from a researcher would best support the student’s assertion?

- “In one site in the wild where transgenic fish were observed, females outnumbered males, while in another the numbers of females and males were equivalent.”

“Though some presence of transgenic fish in the wild has been recorded, there are insufficient studies of the impact of those fish on the ecosystems into which they are introduced.”

“The ecosystems into which transgenic fish are known to have been introduced may represent a subset of the ecosystems into which the fish have actually been introduced.”

“Through interbreeding, transgenic fish might introduce the trait of fluorescence into wild fish populations, making those populations more vulnerable to predators.”

SAT5 RW 2.15

The practice of logging (cutting down trees for commercial and other uses) is often thought to be at odds with forest conservation (the work of preserving forests). However, a massive study in forest management and preservation spanning 700,000 hectares in Oregon’s Malheur National Forest calls that view into question. So far, results of the study suggest that forest plots that have undergone limited logging (the careful removal of a controlled number of trees) may be more robust than plots that haven’t been logged at all. These results, in turn, suggest that _____

Which choice most logically completes the text?

- A. logging may be useful for maintaining healthy forests, provided it is limited.
- B. other forest management strategies are more effective than limited logging.
- C. as time passes, it will be difficult to know whether limited logging has any benefits.
- D. the best way to support forest health may be to leave large forests entirely untouched.

SAT5 RW 2.26

While researching a topic, a student has taken the following notes:

- A lever is a simple machine consisting of a rigid beam and a fulcrum.
- The fulcrum is the point about which the beam pivots. The input force (effort) is the force applied to the lever.
- The output force (load) is the force that the lever exerts on another object.
- In first-class levers, the fulcrum is located between the effort and the load.
- In second-class levers, the load is located between the effort and the fulcrum.

The student wants to contrast first-class levers and second-class levers. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- In levers, the effort is the force applied to the lever; the load, in contrast, is the force that the lever exerts on another object.
- In first-class and second-class levers, the fulcrum and the load are in different locations.
- First-class levers are simple machines consisting of a rigid beam and a fulcrum, but then again, the same is true of second-class levers.
- In first-class levers, the fulcrum is located between the effort and the load, but in second-class levers, the load is located between the effort and the fulcrum.

SAT5 RW 2.27

While researching a topic, a student has taken the following notes:

- The melting rate of glaciers varies based on air temperature.
- In the warm summer months, massive glaciers on the coast of Greenland melt into the surrounding water.
- The melting glaciers contribute to rising sea levels each summer.
- Huge icebergs also break off Greenland’s glaciers into the water and melt.
- In 2017, geoscientist Twila Moon found that the iceberg melting rate depends not on air temperature but on water temperature.
- Because water temperature is consistent, melting icebergs contribute to rising sea levels all year.

The student wants to emphasize a similarity between glaciers and icebergs in Greenland. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A. Because icebergs break off Greenland’s glaciers into the water, their melting rate depends on water temperature.
- B. Greenland’s glaciers and icebergs both melt during the year, contributing to rising sea levels.

Geoscientist Twila Moon found that the melting rate of Greenland’s icebergs, unlike that of glaciers, does not depend on

- C. air temperature.
- D. which remains consistent throughout the year.
