SAT6 RW 1.5

The following text is from Betty Smith’s 1943 novel *A Tree Grows in Brooklyn*. Francie, a young girl, visits the library often.

Francie thought that all the books in the world were in that library and she had a plan about reading all the books in the world. She was reading a book a day in alphabetical order and not skipping the dry ones. She remembered that the first author had been Abbott. She had been reading a book a day for a long time now and she was still in the B’s. Already she had read about bees and buffaloes, Bermuda vacations and Byzantine architecture. For all her enthusiasm, she had to admit that some of the B’s had been hard going. But Francie was a reader.

©1947 by Betty Smith

Which choice best states the main purpose of the text?

- A. To illustrate Francie’s enjoyment of an unusual topic
- B. To explain why Francie prefers reading over other activities
- C. To portray Francie’s determination to meet a goal
- D. To describe a book that Francie greatly admires

SAT6 RW 1.6

The people of medieval Europe have traditionally been seen as uninterested in cleanliness and hygiene, but modern research has shown that this is largely a myth. According to historian Eleanor Janega, most medieval towns in Europe had at least one public bathhouse, which often offered both full-immersion baths and—more affordably—steam baths. While such amenities were available mainly to town dwellers, regular bathing in rivers and streams or daily sponge baths at home were common practices throughout medieval Europe.

Which choice best describes the function of the underlined portion?

- A. It asserts that in medieval Europe steam baths were more popular in rural areas than in urban ones.
- B. It describes a limitation of earlier historians’ studies of medieval European bathing habits.
- C. It concedes that not all people in medieval Europe had access to public bathhouses.
- D. It explains why Janega decided to study the popularity of public bathhouses in medieval Europe.

SAT6 RW 1.7

When classical pianist Martha Argerich performs, it appears as if the music is coming to her spontaneously. She’s highly skilled technically, but because of how freely she plays and her willingness to take risks, she seems relaxed and natural. Her apparent ease, however, is due to a tremendous amount of preparation. Despite Argerich’s experience and virtuosity, she never takes for granted that she knows a piece of music. Instead, she approaches the music as if encountering it for the first time and tries to understand it anew.

Which choice best states the main purpose of the text?

- A. To provide details about how Argerich identifies which pieces of music she will perform
- B. To assert that Argerich’s performances look effortless because of how she prepares for them
- C. To discuss the kinds of music Argerich feels most comfortable encountering for the first time
- D. To describe the unique way that Argerich approaches music she hasn’t performed before

Text 1

An excavation in Chiquihuite Cave in central Mexico has upended the belief that approximately 13,000 years ago, a group known as the Clovis people were the first human inhabitants of North America. More than 200 crude stone tools were found embedded in a layer of earth that is up to 33,150 years old, revealing that humans occupied the cave thousands of years before the Clovis people reached the continent.

Text 2

The objects uncovered in Chiquihuite Cave are intriguing, but it is premature to characterize them as tools. The stone pieces are so roughly shaped that they may have simply fractured from rocks during natural geological activity in the cave. Moreover, their unearthing has thus far not been accompanied by discoveries of other signs of human activity or even traces of human DNA from surfaces.

Based on the texts, how would the author of Text 2 most likely respond to the underlined claim in Text 1?

- By suggesting that it draws a plausible connection between two groups of people but will need to be confirmed with

A. further study
- B. By asserting that it rests on an assumption about the stone pieces that is not sufficiently supported by available evidence
- C. By acknowledging that it will most likely be proved correct when the stone pieces undergo more detailed analysis
- By pointing out that it fails to account for evidence that the Clovis people were active on the continent as early as is

D. commonly thought

SAT6 RW 1.9

Many literary theorists distinguish between *fabula*, a narrative’s content, and *syuzhet*, a narrative’s arrangement and presentation of events. In the film *The Godfather Part II*, the *fabula* is the story of the Corleone family, and the *syuzhet* is the presentation of the story as it alternates between two timelines in 1901 and 1958. But literary theorist Mikhail Bakhtin maintained that *fabula* and *syuzhet* are insufficient to completely describe a narrative—he held that systematic categorizations of artistic phenomena discount the subtle way in which meaning is created by interactions between the artist, the work, and the audience.

Which choice best states the main idea of the text?

Literary theorist Mikhail Bakhtin argued that there are important characteristics of narratives that are not fully

A. encompassed by two concepts that other theorists have used to analyze narratives.

Literary theorist Mikhail Bakhtin claimed that meaning is not inherent in a narrative but is created when an audience

B. encounters a narrative so that narratives are interpreted differently by different people.

The storytelling methods used in *The Godfather Part II* may seem unusually complicated, but they can be easily

C. understood when two concepts from literary theory are utilized.

Narratives that are told out of chronological order are more difficult for audiences to understand than are narratives

D. presented chronologically.

Partial List of Candidate Species for De-extinction

Common name	Scientific name	Became extinct
Huia	<i>Heteralocha acutirostris</i>	1907
Caribbean monk seal	<i>Monachus tropicalis</i>	1952
Passenger pigeon	<i>Ectopistes migratorius</i>	1914
Saber-toothed cat	<i>Smilodon</i>	11,000 years before present
Woolly mammoth	<i>Mammuthus primigenius</i>	6,400 years before present

The passage of time is among the many obstacles faced by scientists who are pursuing de-extinction efforts—that is, efforts to use breeding or a mixture of cloning and genetic engineering to bring back extinct species. Specifically, researchers are concerned that the longer a species has been extinct, the less likely it is that a suitable habitat still exists for that species. Among candidate species for de-extinction, this problem would be especially concerning for the _____

Which choice most effectively uses data from the table to complete the statement?

- passenger pigeon (*Ectopistes migratorius*), which became extinct only a few years after the huia (*Heteralocha A. acutirostris*).

B. saber-toothed cat (*Smilodon*), which became extinct 11,000 years ago.

woolly mammoth (*Mammuthus primigenius*), which became extinct several thousand years before the saber-toothed cat C. (*Smilodon*).

D. Caribbean monk seal (*Monachus tropicalis*), which became extinct in 1952.

Land Area Covered by Native Flowering Plants at a Site in Antarctica

Species	Area covered in 2009 (in square meters)	Area covered in 2018 (in square meters)	Percent increase in area covered from 2009 to 2018
<i>Deschampsia antarctica</i>	1,230	1,576	28%
<i>Colobanthus quitensis</i>	6.9	10.7	55%

The only flowering plant species native to Antarctica, *Colobanthus quitensis* and *Deschampsia antarctica* grow in places where the earth remains free of ice for much of the year. Botanist Niccoletta Cannone wondered how the warming of Antarctica’s climate in recent years had affected these species, so she visited a site in Antarctica, first in 2009 and later in 2018, to count the number of plants growing there. Cannone found that the area of land covered by the two species had significantly expanded during the nine-year period. While both species likely benefited from warming temperatures, *Colobanthus quitensis* _____

Which choice most effectively uses data from the table to complete the comparison?

- A. suppressed the growth of *Deschampsia antarctica*, which covered a smaller area of land in 2018 than it had in 2009.
- B. saw a greater expansion than *Deschampsia antarctica* did, increasing the area of land it covered by more than half.
- C. showed a greater increase in the average size of individual plants than *Deschampsia antarctica* did.
- D. covered land newly freed from ice at a rate 55% faster than that of *Deschampsia antarctica*.

As media consumption has become increasingly multiplatform and socially mediated, active news acquisition has diminished in favor of an attitude known as “news finds me” (NFM), in which people passively rely on their social networks and ambient media environments for information about current events. Homero Gil de Zúñiga and Trevor Diehl examined data on a representative group of adults in the United States to determine participants’ strength of NFM attitude, political knowledge, and political interest. Although no major election took place sufficiently near the study for Gil de Zúñiga and Diehl to identify causality between NFM and voting behavior, they did posit that NFM may reduce voting probability through an indirect effect.

Which finding, if true, would most directly support the idea advanced by Gil de Zúñiga and Diehl?

- NFM attitude tends to increase in strength as major elections approach, and people are significantly more likely to vote in
- A. major elections than in minor elections.
- NFM attitude has a strong negative effect on political knowledge and interest, and there is known to be a strong positive
- B. correlation between political knowledge and interest and the likelihood of voting.
- Political interest is known to have a strong positive effect on likelihood of voting but shows only a weak positive effect on
- C. political knowledge, and NFM attitude shows little correlation with either political knowledge or political interest.
- The likelihood of voting increases as political knowledge increases, and the relationship between NFM attitude and
- D. political knowledge tends to strengthen as the size of people’s social networks increases.

In dialects of English spoken in Scotland, the “r” sound is strongly emphasized when it appears at the end of syllables (as in “car”) or before other consonant sounds (as in “bird”). English dialects of the Upland South, a region stretching from Oklahoma to western Virginia, place similar emphasis on “r” at the ends of syllables and before other consonant sounds. Historical records show that the Upland South was colonized largely by people whose ancestors came from Scotland. Thus, linguists have concluded that _____

Which choice most logically completes the text?

the English dialects spoken in the Upland South acquired their emphasis on the “r” sound from dialects spoken in
A. Scotland.

emphasis on the “r” sound will eventually spread from English dialects spoken in the Upland South to dialects spoken
B. elsewhere.

C. the English dialects spoken in Scotland were influenced by dialects spoken in the Upland South.

D. people from Scotland abandoned their emphasis on the “r” sound after relocating to the Upland South.

In 2016 biological anthropologist Heather F. Smith and her team investigated the evolution of the appendix, an intestinal organ that is present in some mammals, including humans, but is generally thought to have no function. Studying 533 mammal species, the team found that the appendix has emerged independently across multiple lineages in separate instances and, significantly, hasn't disappeared after emerging in specific lineages. Moreover, the team determined that species with the organ tend to have higher concentrations of lymphoid tissue, which supports immune responses, in the cecum, the organ the appendix is attached to. Therefore, the team hypothesized that the appendix likely _____

Which choice most logically completes the text?

- A. was once present in many nonmammal species but has since disappeared from those lineages.
- B. has been preserved in certain mammal species because it benefits their immune systems.
- C. will emerge in a greater number of mammal species because it may serve a necessary function in the immune system.
- D. produced higher concentrations of lymphoid tissue in mammals in the past than it does currently.

While researching a topic, a student has taken the following notes:

- In the 1930s, the Imperial Sugar Cane Institute in India sought to limit the country’s dependence on imported sugarcane.
- The institute enlisted botanist Janaki Ammal to breed a local variety of sugarcane.
- She crossbred the imported sugarcane species *Saccharum officinarum* with grasses native to India.
- She succeeded in creating sugarcane hybrids well suited to India’s climate.

The student wants to emphasize Janaki Ammal’s achievement. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- By crossbreeding the imported sugarcane species *Saccharum officinarum* with grasses native to India, Ammal
- A. succeeded in creating sugarcane hybrids well suited to India’s climate.
- In the 1930s, the Imperial Sugar Cane Institute, which enlisted Ammal, sought to limit dependence on imported
- B. sugarcane.
- Ammal was enlisted by the Imperial Sugar Cane Institute at a time when a local variety of sugarcane needed to be
- C. produced.
- As part of efforts to breed a local variety of sugarcane, an imported sugarcane species called *Saccharum officinarum*
- D. was crossbred with grasses native to India.

While researching a topic, a student has taken the following notes:

- Scientists have developed a “freeze-thaw” battery that can retain 92% of its charge after twelve weeks.
- The battery contains molten salt (a type of salt that liquifies when heated and solidifies at room temperature).
- When the salt is in a liquid state, energy flows through the battery.
- When the salt is in a solid state, energy stops flowing and is stored in the battery.
- The stored (frozen) energy can be used by reheating (thawing) the battery.

The student wants to specify how the salt enables energy storage. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- Scientists have developed a freeze-thaw battery that contains molten salt, which liquifies when heated and solidifies at
- A. room temperature.
 - B. The stored energy in a freeze-thaw battery, which contains molten salt, can be used by reheating the battery.
 - When the molten salt in a freeze-thaw battery solidifies at room temperature, energy stops flowing and can be stored in
 - C. the battery.
 - D. Molten salt allows a freeze-thaw battery to retain 92% of its charge after twelve weeks.
